## **REFRESHER EEG WORKSHOP:**

In continuation of the previous Introductory and Intermediate EEG workshops, this 2-day workshop will first present a refresher of the important EEG concepts required for clinical interpretation. Attention will then shift to a series of clinical situations with interesting EEG manifestation: (a) seizures in neonate and older children; (b) multifocal seizures; (c) infantile spasms; (d) non-seizure repetitive movements. EEG evolution at various stages of clinical progression will be discussed, using coma, near-drowning, hypoxic/ischemic insult etc. It is hoped that both technical and medical practitioners will find this workshop beneficial to their daily practice.
